¹This information and the rest of the table applies to cars sold outside of California and Section 177 states.

²Current EPA numbers are listed; EPA is revising its test for mpg ratings, which will likely result in lower values for future model year vehicles.

³Air pollution scores are on a scale of 1-10 with 10 being best. GHG emissions are annual CO2 equivalent emissions and are "full fuel-cycle estimates." See the website for full details.

⁴All values are from Kelly Blue Book, except those marked with an asterisk. These are from the manufacturers.

⁵EPA's size ratings are in parentheses.

⁶These vehicles were rated "greenest" in their classes by ACEEE. Some of these have likely been ranked off their CA versions, not those available here.

⁷These vehicles have listings with engines of the same size and the same mileage ratings but different lower air emissions ratings.

⁸Other engines were Bin4, which gives them 7's for air poll. rankings

⁹Other engines were Bin5, which give it them 6's for air poll. rankings.

¹⁰Other engine was a Bin8, which gives it a 3 for air poll. rankings.
