¹This information and the rest of the table applies to cars sold outside of California and Section 177 states.

²Current EPA numbers are listed; EPA is revising its test for mpg ratings, which will likely result in lower values for future model year vehicles.

³Air pollution scores are on a scale of 1-10 with 10 being best. GHG emissions are annual CO2 equivalent emissions and are "full fuel-cycle estimates." See the website for full details.

⁴All are MSRPs from the manufacturer for automatic transmissions and no options. Many of the pickups have larger versions or accessories with considerably higher prices.
