<sup>1</sup>Current EPA numbers are listed; EPA is revising its test for mpg ratings for MY08 vehicles, which will likely result in lower values

<sup>2</sup>All are MSRPs from the manufacturer for automatic transmissions and no options. Many of the pickups have larger versions or accessories with considerably higher prices.

<sup>3</sup>BMW plans to offer diesels in 2008 but did not specify the vehicle(s). GM said it may offer diesels in Cadillacs soon. Honda plans to bring a diesel to the US in 2009

<sup>4</sup>Future models are based on the best available information; there is no guarantee these vehicles will be available in the model year given.
