<i>Pickups</i>															
Chevy Silverado/GMC Sierra <sup>10</sup>	2007	Bin8	5.3	8	2WD	18	21	3	4	no	3	9.6	18.0	\$29,610	\$250
Chevy Silverado/GMC Sierra <sup>10</sup>	2007	Bin8	5.3	8	4WD	17	19	3	3	no	3	10.3	19.0	\$32,060	\$650

\*Other hybrids have been tentatively announced as well. Ford has announced hybrid versions of its Five Hundred/Mercury Montego and Edge/Mercury MKX (crossover) will appear in the 2008-10 timeframe. Honda has announced an unnamed new hybrid is planned for 2010. Hyundai plans hybrid versions of its Accent and Sonata but only tentative dates of 2009-10 have been given. Mercedes may have an S-class hybrid on the market around 2008. Finally, Porsche says it will sell a hybrid version of its Cayenne SUV by the end of the decade.

<sup>1</sup>This information and the rest of the table applies to cars sold outside of California and Section 177 states.

<sup>2</sup>Current EPA numbers are listed; EPA is revising its test for mpg ratings for MY08 vehicles, which will likely result in lower values.

<sup>3</sup>Air pollution scores are on a scale of 1-10 with 10 being best. GHG emissions are annual CO<sub>2</sub> equivalent emissions and are "full fuel-cycle estimates." See the website for full details.

<sup>4</sup>Energy Impact Score is an estimate on fueleconomy.gov of the barrels of petroleum the vehicle uses per year, including producing, refining, delivering and burning fuel.

<sup>5</sup>All values are from Kelly Blue Book.

<sup>6</sup>As of Oct. 1, 2006, Toyota's (and Lexus') credits began to phase out. Listed values are until the end of Mar. 2007 then credits are cut in half for another quarter then they are gone.

<sup>7</sup>The hybrid Altima is expected to be released some time in calendar year 2007 but may not be available in Washington.

<sup>8</sup>Future models are based on the best available information; there is no guarantee these vehicles will be available in the model year given.

<sup>9</sup>GM plans to use its 2-mode hybrid system in the 2008 Vue Green Line, which is supposed to have much better fuel economy (45% better than the non-hybrid version is reported).

<sup>10</sup>These trucks are minimal hybrids. The mpg gain is ~1mpg and they are only in limited production. More advanced hybrid versions are expected in the future.
